Allowable Subject Matter

1. Claims 1-9 allowed.

Independent claim 1 is directed to towards a motion vector detecting method which recites “....computing a first accurate difference measure for the first closest matching pixel blocks wherein the first accurate difference measure is a member of a plurality of accurate difference measures computing a second accurate difference measure for the second closest matching pixel block, wherein the second accurate difference measure is a member of the plurality of accurate difference measures; selecting the first closest matching pixel block as a origin block when the first accurate difference measure is less than or equal to other members of the plurality of accurate difference measure; selecting the second closest matching pixel block as the origin block when the second accurate difference measure is less than the first accurate difference measure and less than or equal to other members of the plurality of accurate difference measures; and computing the motion vector using the origin block and the macroblock...” which is no anticipated nor obvious over the art of record. Dependent claims 2-9 are allowed for the reasons concerning the independent claim.
